RELEVANT WORK

Software Developer

CourseCareer

May 2024 - Present

Apprentice - Online

- Create Websites with HTML and CSS
- adding interactivity to those sites with JavaScript
- Create Mini Projects using the skills attained through the course
- Frameworks like React
- Bash Fundamentals and Deploying Projects with Git and Github
- Learning about CS principles like: Algorithm Analysis, Data Structures & Problem Solving Techniques
- Backend Development with Go
- Software Engineering Principles such as: Clean Code and Software Design and Testing

Front-End Engineer

Codecedemy

November 2023 - Present

Apprentice - Online

- Currently take front-end engineering course and building my knowledge and portfolio
- Introduced to UI/UX concepts and working with different frameworks and libraries

Front-End Web Developer

One Code Camp

March 2024 - March 2024

Bootcamp - Online

- Introduce participants to the fundamental concepts of front-end development.
- Offer practical, hands-on experience with HTML, CSS, JavaScript, and an introduction to React.
- Explore the structure and semantics of web pages using HTML.
- Familiarize participants with the principles of styling and design using CSS.
- Dive into the functionality and interactivity of web pages through JavaScript.
- Offer an introductory overview of React and its role in modern web development.
- Encourage active participation through practical exercises and projects.
- Foster a supportive learning environment conducive to exploration and experimentation.
- Prepare participants with foundational skills to pursue further learning in front-end development.

PROJECTS
